

RITU NAMBATH

LEAD MOBILE APPLICATION DEVELOPER | FLUTTER & ANDROID

+91-6359338882 | ritunambath@gmail.com | Ahmedabad, Gujarat | <https://linkedin.com/in/ritu-nambath-67123856>

PROFESSIONAL SUMMARY

Lead Mobile Application Developer with experience building and modernizing Android and Flutter applications from development to release. Skilled in **Kotlin, Core Java, Dart, Flutter, and mobile architecture**, with hands-on experience in app migration, debugging, optimization, and maintenance. Uses **Cursor, Claude, ChatGPT, and Gemini** to improve development, documentation, and code review workflows.

TECHNICAL SKILLS

Android Development

Languages - Kotlin, Core Java

Android Technologies:- Android SDK, Jetpack Compose, Jetpack Components (ViewModel, LiveData, Room, Navigation, WorkManager), Custom Views

Architecture & State Management:- MVVM, MVP

Networking & APIs:- Retrofit, OkHttp, REST APIs, WebSockets

Databases & Storage:- Room, SQLite

Concurrency:- Kotlin Coroutines, Asynchronous Programming

Dependency Injection:- Dagger, Hilt

Firebase:- Firebase Cloud Messaging (FCM), Authentication, Crashlytics

Native & Third-Party Integrations:- Bluetooth SDKs, OpenTok, Branch.io, Android Method Channels

Build, CI/CD & Version Control:- Gradle, Git, GitHub, Microsoft Azure, Bitbucket, Bitrise

Flutter Development

Language:- Dart

Flutter Technologies:- Flutter, Flutter Widgets, Flutter Navigation, Custom Widgets, Platform Integration, Method Channels

Architecture & State Management:- BLoC, Provider

Networking & APIs:- Dio, REST APIs, WebSockets

Databases & Storage:- Hive

Native & Third-Party Integrations:- OpenTok, Branch.io

Firebase:- Firebase Cloud Messaging (FCM), Authentication

Build, CI/CD & Version Control:- Microsoft Azure, Git, GitHub, Bitbucket, Bitrise

AI & Developer Productivity: Cursor, Claude, ChatGPT, Gemini, Prompt Engineering, Code Review & Refactoring, Technical Documentation

PROFESSIONAL EXPERIENCE

Lead Mobile Application Developer | TintBytes.com

Sep 2025 – Jan 2026 • Ahmedabad

- Developed and delivered mobile applications from the ground up, covering implementation, debugging, optimization, and release readiness.
- Applied AI-assisted development tools including Cursor, Claude, ChatGPT, and Gemini to accelerate development, debugging, code optimization, documentation, and engineering workflows.

Senior Android & Flutter Developer | iPath Solutions

Dec 2024 – Apr 2025 • Ahmedabad

- Upgraded a legacy mobile application for compatibility with newer Android versions, improving application performance, stability, and user experience.

- Collaborated in an agile environment across problem solving, planning, implementation, and delivery while communicating effectively with stakeholders.

Senior Mobile Developer | ADDV HealthTech Solutions

Sep 2020 – Dec 2024 • Ahmedabad

- Migrated 3 mobile applications from Java to Kotlin and subsequently to Flutter, improving maintainability and code quality.
- Refactored Android applications from MVP to MVVM and implemented BLoC in Flutter to improve architecture, separation of concerns, and scalability.
- Mentored trainees on coding standards, architecture, debugging, and development best practices.
- Managed work through JIRA, maintained repositories in Bitbucket, and integrated Bitrise CI/CD for automated build and deployment workflows.
- Performed unit testing, debugging, code reviews, and application maintenance while keeping solutions aligned with evolving mobile-platform requirements.

Senior Android Developer | ELEGANZ IT Solutions Pvt. Ltd.

Nov 2017 – May 2020 • Ahmedabad

- Built Android applications from scratch using Kotlin and contributed across application development, debugging, and delivery.
- Mentored junior developers on coding best practices and participated in client discussions to align technical solutions with business requirements.

Android Trainer | TOPS Technology Pvt. Ltd.

May 2016 – Jun 2017 • Ahmedabad

- Trained students and interns in C, C++, Core Java, and Android through practical coding exercises and real-world projects.
- Mentored trainees through interactive sessions, resume building, and interview preparation to improve job readiness.

Android Trainee | MSP IT CONCEPT

Jan 2016 – Apr 2016 • Ahmedabad

- Completed Android training and developed Android applications as part of hands-on learning and project work.

PROJECTS

Body Roundness Calculator — Developed a health and fitness application that calculates Body Roundness Index (BRI) using height and waist circumference to provide insights into body shape, fat distribution, and related health indicators.

Fall Risk Assessment — Developed a health and mobility assessment application that evaluates fall risk using movement and activity indicators, including step tracking, sit-to-stand performance, walking mobility, balance assessments, and activity monitoring.

PAS Audit — Enhanced a mobile auditing tool used for inspections, compliance checks, and real-time issue tracking; upgraded the application to Android SDK 34 and implemented required permission changes.

AppLocum — UK Medical Staffing — Migrated the application from Java to Kotlin and then to Flutter; implemented BLoC, a custom calendar for task tracking, Branch.io for link sharing, and a manual timer notification system.

Healthya — UK Medical Application — Worked on a remote consultation, appointment booking, and prescription platform; migrated from Kotlin to Flutter, implemented BLoC, integrated OpenTok video conferencing through native method channels, and configured Bitrise automated builds.

ConnectMyHealth — UK Medical Application — Worked on a healthcare platform for remote consultations, appointment booking, and prescription services; migrated from Kotlin to Flutter, implemented BLoC, integrated OpenTok with native handling via method channels, and configured Bitrise automated builds.

Niran Market Clock / Market24 — Developed and maintained a mobile application that notifies users when global stock markets open, with focus on accurate and timely market-opening alerts.

SoberSense — Integrated a BacTrack device through its Bluetooth SDK and implemented Bluetooth receiver services with SDK callbacks to retrieve and monitor alcohol-level results.

EDUCATION

Master of Computer Applications (MCA) — GTU

CGPA: 7.45 | CPI: 7.12

CAREER HIGHLIGHTS

- Published multiple mobile applications on the App Store and Google Play Store.
- Led application modernization and migration initiatives across Java, Kotlin, and Flutter.
- Mentored junior developers and trainees and promoted coding and architecture best practices.
- Implemented CI/CD workflows for mobile application builds and deployments.
